

Full-Stack Developer

Chicago, IL
Fall 2020

Mesh++ designs solar- and battery-powered WiFi routers with a dedicated wireless backhaul for temporary or permanent outdoor installations. Our intention is to make last-mile infrastructure fully wireless, allowing for simple temporary installations and non-intrusive permanent ones. Mesh++ has completed installations over underserved communities all over the world with the goal of developing a platform that enables anyone to bring internet access to their community.

We are looking for a Full-Stack Developer to help build our next-generation software and data management platform. This includes rapid ideation, prototyping, and maintaining a feedback loop with customers and stakeholders. As an early startup, tasks outside of the immediate job description may be required occasionally. We seek individuals who are enthusiastic to take on new responsibilities as we continue to grow.

This is a paid position, \$90k-120k annual depending on experience, equity available.

Responsibilities:

- Helping design our new software platform
- Integrating multiple tools together into an intuitive customer experience
- Leading feature implementation
- Rapid development and testing
- Design verification with customers
- Long-term improvements

Minimum Qualifications:

- Experience designing simplified products for a non-technical audience
- Ability to design intuitive user interfaces
- Leadership experience
- Proficiency in a preferred data science platform
- Experience working with Javascript and PostgreSQL

Preferred Qualifications:

- Familiarity with networking products and equipment
- Experience designing simplified products for a non-technical audience
- Experience maintaining and displaying large-scale datasets
